WE VALUE YOUR TALENTS!

THE PERFECT SCHOOL FOR STUDENTS IN EXTRA-CURRICULARS

Our flexible school system is designed to give you the freedom to pursue your extra-curricular interests, whether it's music, dance, theater or debate. We work with you to create a customized schedule that allows you to excel in both academics and your chosen art form. Our teachers are experts in their respective fields and are committed to helping you achieve your full potential. International Schooling has students excelling as dancers, theater artists, singers, musicians, painters etc. at state, national and international levels.

EXCEL AS A STUDENT ATHLETE

We understand that long hours of training and constant traveling leaves one exhausted both, physically and mentally and it becomes tough to balance academics and sports together. International Schooling encourages student athletes and helps them excel in their academics as well as sports by customizing course plans and study hours best suited to the needs of our young sportspersons.

This is the first experience with International Schooling, and me and my 2 kids are happy with it. Both kids are 12 and 9 years old and have already experienced the online school model while the covid time. Both are very happy with the curriculum, teachers and the One-To-One teaching method. They are always focused and have more of the studying stuff. Another plus point the flexible lessons timing, where you can decide when you are ready to get the lessons and when not.

All in all, I recommend highly the International Schooling for who is looking for great school experience, flexibility, and finally moderate costs (much better than regular international schools).

Since the time of online education, I realized that online education is the best for my daughters. I was in contact with the international schooling team, after a year of research and thinking I made my decision and it was a new year full of enthusiasm for my two daughters. From the first day I was surprised that they loved the school so much that they say we don't want to go back to the old school. Their teacher is very nice and the most important thing about this school is that the student does not feel pressure and does not care about grades. Just take care of getting the right information and enjoy learning in innovative and unique ways. I have Two daughters the eldest is in grade 5.. the youngest is in grade 3, and we will continue in this school for sure, as it is the most suitable option for them. Thank you international schooling for changing my daughters life for the best.

International schooling has been a blessing to my family. My son in grade 6 and daughter in grade 4 are excited to attend an American school and we the parents, are excited too because it's affordable. I recommend this school to everyone, precisely parents in the Middle East, where American school is super expensive. The lectures are great and the kids are given the best.

International Schooling knows the value of Education. Once you're on board you will see the difference from another online school (I've been to online schooling local base, and observed some online schools as well). International Schooling has a very thorough, and user-friendly system. As a parent/s you will feel that your child/children are not even studying online but in a real class in school (though we know it is virtually). They have well-versed teachers who teach equally, respect their students, and give 101% support to their student's progress in their studies.

Online learning is the future of education and International Schooling is leading it. With Discovery Education, COGNIA, United Nations, and College Board supporting them, you know that your child is on the right path to success.

Thank you International Schooling hope that this can help other parent/s to experience what we are experiencing. All The Best!

It is amazing and extraordinary achievement my son does when he studies in International Schooling. The first time, I found confuse when I my son attended offline school. And he never interest to study math, science. Offline school make him not creative, not smart, not clever and can't focus because offline school is boring and difficult to focus because of the system they have in offline school. The luckiest day on that time was I found the unique title of the school in google . That was international schooling not online schooling. I just enquiry about the school and my son has right schedule for trial session. And when he join this international schooling , I has seen his achievement is amazing and untouchable since grade 7 in the international schooling. The counselor, administrator the teachers are very kind, very helpful and very firendly. The administrator always quick response. Excellent Administrator. Teacher teaches my son in detail. My son understand and can follow all the subject easily and happily. One more thing is the weekly report they have given is so helpful and we can see how our kids progress. Thank you very much to International Schooling.
